Ventus, Latin for "air", is our line of lightweight tenders. Because of their low weight, Ventus boats achieve astonishing performance and speeds even with relatively small outboards. Ventus boats are the only lightweight inflatables on the market with an additional air retaining chamber in the hull which also serves as a leveled anti-skid flooring to keep cargo and feet dry. These boats make ideal tenders or independent craft for carrying crew and provisions. Now Stock Sale, 25% discount on all our stock models!
